Zone 10 Planting Calendar

USDA ZONE 10

Typical last spring frost: around Feb 1 (January to mid February; many years frost-free). Every bar is counted from that date.

Frost dates are averages. Check your local date: look up your ZIP code at almanac.com/gardening/frostdates or ask your county extension office.

Frost is rare: treat fall to spring as your main cool-season window, and give peppers and tomatoes afternoon shade in peak heat.
